EDUCATION

University of California, Berkeley

Aug 2018 – May 2022

B.S. Computer Science — GPA: 3.82 / 4.0

Relevant Coursework: Web Technologies, Data Structures & Algorithms

EXPERIENCE

Stripe

Jul 2022 – Present

Software Engineer II — Payments Infrastructure · San Francisco, CA

- Designed and shipped a high-throughput idempotency layer handling 120K+ transactions/sec using Redis and Postgres, reducing duplicate charges by 99.97%.
- Mentored 2 junior engineers; conducted 50+ code reviews; authored the team's gRPC best-practices guide.

Accenture

Jun 2020 – Aug 2020

Technology Analyst (Frontend) · Remote

- Built reusable React component library (28 components) using TypeScript and Storybook, adopted across 4 internal products.
- Implemented responsive layouts and WCAG 2.1 AA accessibility improvements, reducing reported a11y issues by 78%.
- Integrated GraphQL subscriptions for real-time dashboard updates, eliminating 12 REST polling endpoints.
- Optimized bundle size from 3.2 MB to 890 KB using code splitting, tree shaking, and lazy loading.

PROJECTS

PulseBoard

github.com/alexchen-dev/pulseboard

Tech: React, TypeScript, D3.js, WebSockets, FastAPI

Real-time analytics dashboard with D3.js visualizations, WebSocket-fed live metrics, and a drag-and-drop widget layout. Used by 300+ users in open beta.

PixelForge

github.com/alexchen-dev/pixelforge

Tech: TypeScript, WebRTC, WebGL, Vite, Node.js

Browser-based collaborative pixel-art editor with real-time multi-user editing via WebRTC data channels and WebGL rendering.

SKILLS

Languages: TypeScript / JavaScript, Python, SQL

Frameworks: React / Next.js, D3.js / Three.js

Tools: GitHub Actions / Jenkins, Git

Databases: MongoDB, PostgreSQL / MySQL

ACHIEVEMENTS & CERTIFICATIONS

-
- HackMIT 2021 — Best Infrastructure Hack

MIT 2021

- UC Berkeley Dean's List (6 semesters)

UC Berkeley 2018–2022
