EDUCATION

Midwestern State University

Aug 2017 – May 2021

B.S. Computer Science — GPA: 3.75 / 4.0

Relevant Coursework: Database Systems, Operating Systems, Computer Networks, Distributed Systems, Data Structures & Algorithms

EXPERIENCE

Acme Payment Systems

Jun 2021 – Present

Senior Software Engineer · Chicago, IL

- Designed a high-throughput transaction idempotency layer handling 80K+ ops/sec using Redis and PostgreSQL, reducing duplicate processing by 99.9%.
- Re-architected the payment routing service as a gRPC microservice, reducing average API latency from 310ms to 62ms.
- Built a real-time fraud signal pipeline using Kafka + Flink, feeding 30+ ML model features with sub-200ms end-to-end latency.
- Led migration of monolithic billing service to event-driven architecture (Kafka), improving deployment frequency from monthly to daily.

DataStream Analytics

May 2020 – Aug 2020

Data Engineering Intern · Remote

- Developed an automated ELT pipeline in Apache Airflow + dbt to ingest and model 6 TB/day of event data into Snowflake.
- Reduced Spark job runtime by 55% via partition pruning and broadcast join optimizations across 12 production DAGs.
- Containerized all Airflow tasks with Docker and deployed via Kubernetes on GKE.

BrightPixel Agency

Jan 2020 – Apr 2020

Frontend Developer (Contract) · Remote

- Integrated GraphQL subscriptions for real-time updates, eliminating 9 REST polling endpoints.
- Implemented responsive layouts and WCAG 2.1 AA accessibility improvements, reducing reported a11y issues by 71%.

PROJECTS

FlowCache

github.com/jordanrivera-example/flowcache

Tech: Go, gRPC, Protocol Buffers, Redis, Docker

A consistent-hashing distributed cache in Go supporting LRU eviction, replication factor 3, and automatic node rebalancing. Benchmarked at 600K ops/sec on a 4-node cluster.

JobMatchML

github.com/jordanrivera-example/jobmatch-ml

Tech: Python, PyTorch, HuggingFace, FastAPI, PostgreSQL

Fine-tuned a BERT-based classifier on 10K labeled job descriptions to extract skills and match candidates, achieving F1=0.89 on a held-out test set. Packaged as a FastAPI microservice.

InfraWatch

github.com/jordanrivera-example/infrawatch

Tech: Go, Kubernetes, Prometheus, Helm, PagerDuty API

Kubernetes operator (Go) that watches custom CRDs and auto-scales deployments based on Prometheus metrics, with PagerDuty alerting integration.

SKILLS

Languages: Python, Go, TypeScript / JavaScript, Java, SQL, Bash

Frameworks: FastAPI / Flask / Django, Apache Spark / Flink, Kafka Streams, gRPC / Protocol Buffers

Tools: Docker / Kubernetes, Prometheus / Grafana, GitHub Actions / Jenkins, Git

Databases: PostgreSQL / MySQL, Redis, MongoDB, Elasticsearch

ACHIEVEMENTS & CERTIFICATIONS

- AWS Certified Solutions Architect – Associate

Amazon Web Services 2023

- HackState 2021 — Best Infrastructure Hack

State University 2021

- Speaker: PyCon US 2022 — 'Building Streaming Pipelines with Kafka and Python'

Python Software Foundation 2022

- Dean's List (5 semesters)

Midwestern State University 2017–2021
